NEW DELHI

PROFESSIONAL SUMMARY

Generative AI & Machine Learning Professional with **5.5+ years of experience** in building AI-driven systems across **LLMs, Computer Vision, and Data Analytics**. Skilled in **RAG, AI agents, prompt engineering**, and developing AI applications with backend and API integration. Proven ability to design and deploy intelligent, scalable solutions.

SKILLS

- GenAI/LLMs:** LLMs, Prompt Engineering, RAG, AI Agents
- AI/ML:** NLP, Deep Learning, Computer Vision (YOLO, OpenCV)
- Programming:** Python, SQL
- Application Development:** Django, REST APIs, Backend Development
- Data & BI:** Power BI, Tableau, Looker, Excel
- Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow

EDUCATION

M.TECH – ARTIFICIAL INTELLIGENCE
NIET | 2020 – 2022 | **84%**

B. TECH - ELECTRONICS AND COMMUNICATION
JAMIA HAMDARD | 2015 – 2019 | **70%**

CERTIFICATION

- Machine Learning (IBM)
- Data Science (ExcelR)
- Python & ML (CETPA)

WORK HISTORY

JUNE,2025 – PRESENT

VLCC HEALTHCARE LIMITED, PROGRAMME MANAGER

- Developed SWISS – AI-based video analytics system for footfall analysis, staff monitoring, and customer behavior using computer vision
- Developed Power BI dashboards for FI & MM modules, enabling real-time insights into financial performance, inventory, and operations

January,2025 – May,2025

Data Analyst, SISL Infotech Private Limited

- Developed PDF-to-text conversion system for CMO & PMO offices to enable structured data extraction
- Built APIs for ranking models and time series analysis to support scheme evaluation and insights

August,2020 – February,2024

Senior Analyst, GlobalLogic Technologies

- Worked on Google Knowledge Panel & SGE, analyzing large-scale data using SQL, Looker, and statistical methods.
- Ensured data quality, KPI tracking, and generated actionable insights for business decision-making.

June,2019 – March,2020

Software Engineer, Prakhar software solution private limited

- Developed HR chatbot using Rasa and Spacy for conducting interviews can streamline the hiring process, save time, and improve the candidate experience.
- Worked on the chatbot data for better accuracy using Python, SQL and machine learning.

PROJECTS

- COVID ANALYSIS USING MACHINE LEARNING**
Analyzing COVID-19 data using machine learning can be a valuable approach to gain insights into the spread of the virus, predict future trends, and make data-driven decisions.
- SWISS – AI Video Analytics System**
Built using **YOLO, DeepSORT, OpenCV** for workforce monitoring & analytics
- Shadon – AI Voice & Chat Assistant**
Developed **LLM-powered assistant** using Django with voice + text interaction
- HR Chatbot (Rasa NLP)**
Automated HR workflows using conversational AI
- Power BI Dashboards (FI & MM)**
Delivered insights on finance, inventory, and operations
